Exp 2 – Zoho Creator Setup and Platform Exploration

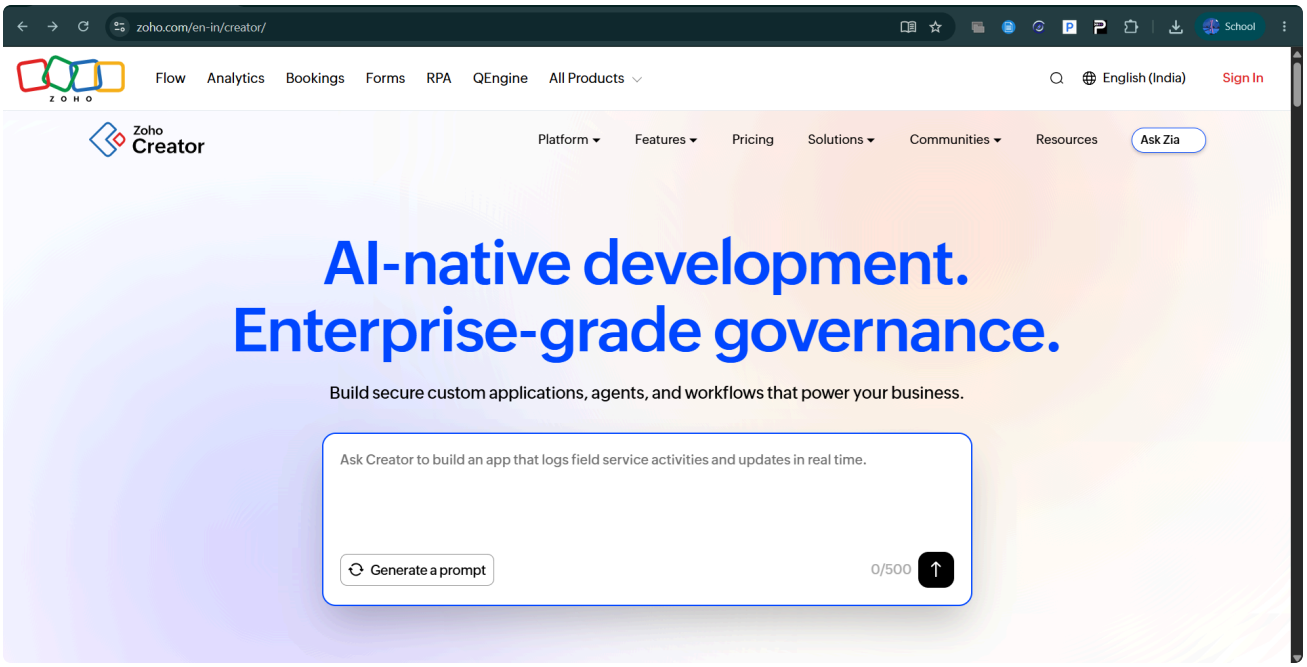

Aim

To explore the features of Zoho Creator and learn how to set up an account, move around the platform, and create a basic Bank Management System application.

Procedure

Zoho Creator Homepage

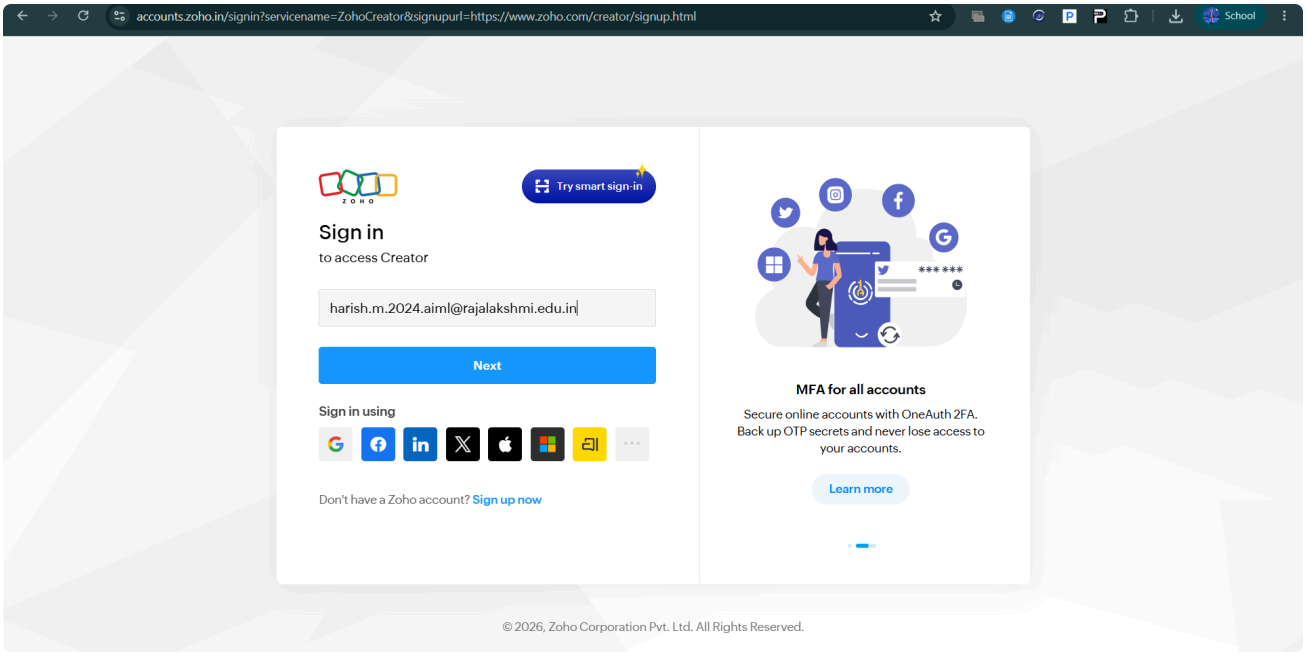

- Open a web browser and go to the Zoho Creator website.
- The homepage shows the AI-powered low-code platform features.
- Note the input box where you can describe an app.
- Click **Sign In**.

Login Page

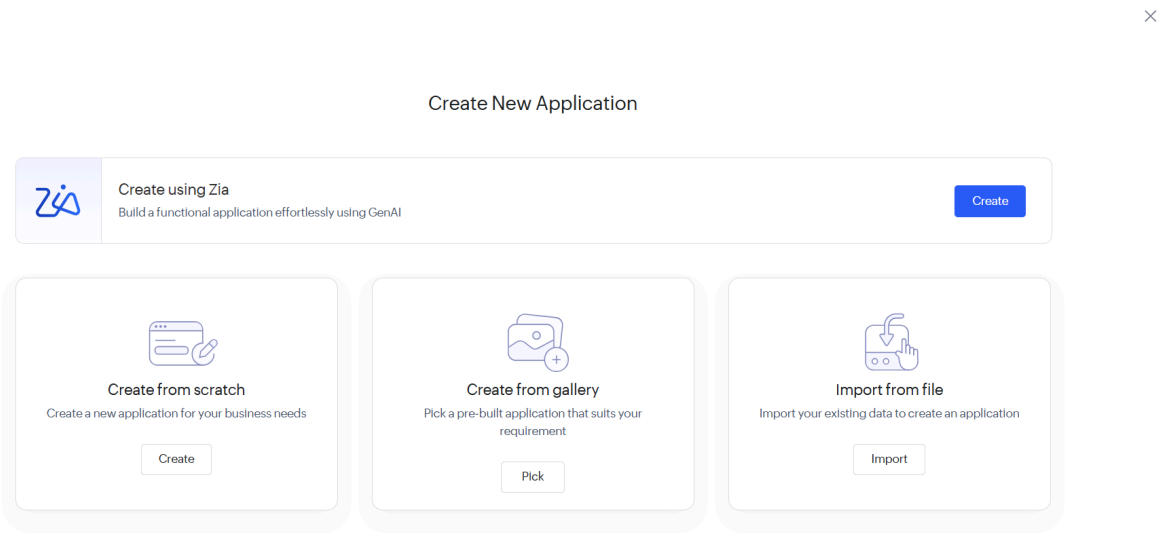

- Enter the registered email ID and click **Next**.
- Or choose another sign-in option (Google, LinkedIn, etc.).

- Complete the login to open the platform.

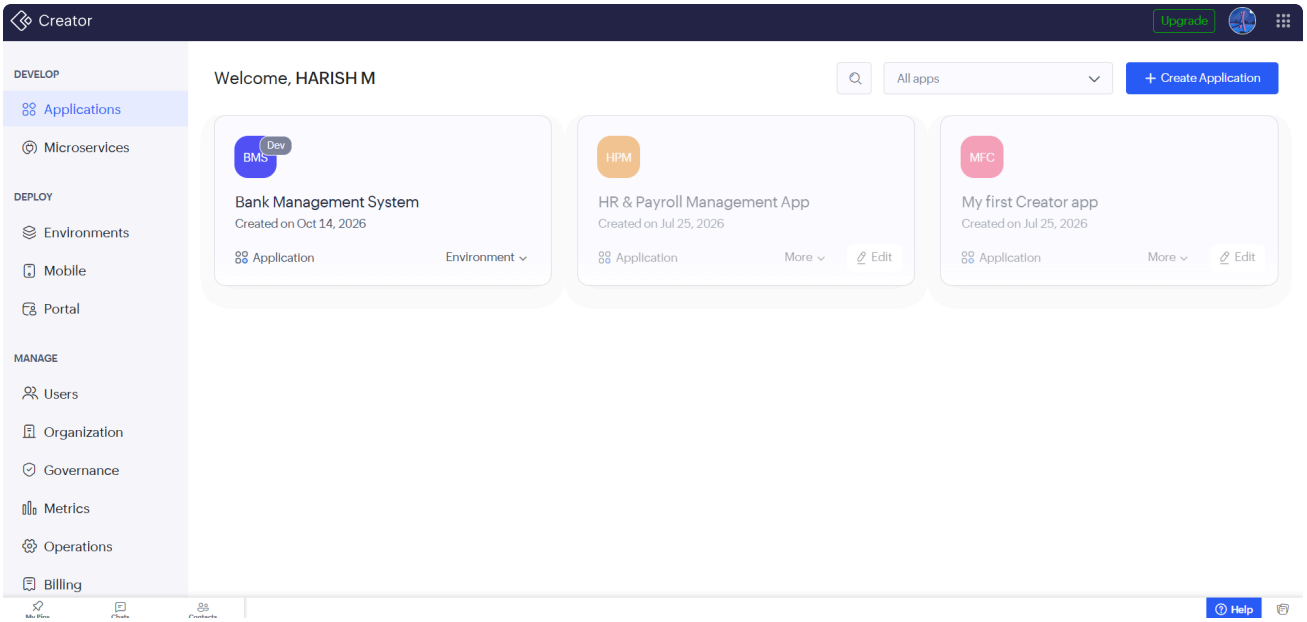

Create New Application

- The Create New Application window opens.
- Options shown: Create using Zia (AI), Create from scratch, Create from gallery, Import from file.
- Select **Create from scratch** and name it Bank Management System.

Dashboard

- After login, the dashboard is shown.
- The new Bank Management System app appears in the Applications list.
- The left panel has Applications, Environments, Users, Organization, and Governance.

Result

The Zoho Creator platform was explored. Logging in, moving around the dashboard, and creating the Bank Management System app using low-code features were understood.
